

Acting Chief, Intelligence Information Staff, OHR 10 October 1958  
ATTN: [REDACTED] 25X1A9a  
THRU : Chief, Industrial Division, OHR  
Acting Chief, Producers Equipment Branch, D/I/OHR

Review of Poland IPC List.

1. The following changes and additions are to be made to the Interagency Clandestine Collection Priorities Committee List for Poland:

- a. Page 31-33: Delete Section G on the electrotechnical industry.
- b. Page 33: Add a Background Statement to Section H, Machinery and Equipment Building Industries to read: "Prior to World War II, Poland's manufacturing industry was largely limited to the manufacture of textiles, household goods, and processed foods. Since then, Poland has emphasized the metallurgical, machine building, and chemical industries toward a more diversified economy.

However, the machine building industries has had an unbalanced development. Several major branches are export-oriented, having capacities in excess of domestic demand; while other branches are seriously underdeveloped to meet internal needs.

Among the major products of Poland's machine building industries are locomotives and rolling stock, trucks, automobiles, buses, metalworking machinery, and machinery and equipment for agriculture, coal mining, and electrotechnical industries. In 1956, the production of machinery and equipment accounted for nearly a fifth of the gross production of all manufacturing."

- c. Page 33: First paragraph of Basic Requirements to read: "Output statistics, both planned and actual, in physical units and value terms; Bloc and non-Bloc imports and exports of machinery products, especially trade with under-developed areas; planned and actual investment; size of the labor force, including wages and a breakdown by skills; production costs and wholesale prices; inputs of labor and materials; sources of raw materials and semi-fabricated materials; and dependence upon outside sources for technological know-how.

Among the machinery and equipment items, the following are important: Metalworking equipment, metallurgical equipment, agricultural machinery, chemical and petroleum refining equipment, trucks, buses, passenger cars, locomotives and

rolling stock, tractors, electrical and power generating equipment, and mining equipment."

- d. Pages 33-34, List of Targets: (1) Target No 1 to read: "Ministry of Heavy Industry." (2) Add the following targets:
- (a) Cokop (exports industrial equipment) - located in Warsaw.
  - (b) Centrosap (imports materials and equipment for the iron and steel industry) - located in Stalinogrod.
  - (c) Klektria (imports raw materials and equipment for the electrical industry) - located in Warsaw.
  - (d) Metalexport (exports metal goods machinery, and rolling stock) - located in Warsaw.
  - (e) Weglekoks (imports machinery and equipment for the coal mining industry) - located in Stalinogrod.
  - (f) Central Board of Electrical Equipment Industry (Centralny Zarzad Przemyslu Elektrycznych) - located in Warsaw.
  - (g) Central Board of Electrical Machine Industry (Centralny Zarzad Przemyslu Maszyn Elektrycznych) - probably located in Warsaw.
  - (h) Central Board for Mining Machinery (Centralny Zarzad Budowy Maszyn Gorniczych) - located in Bytom.
  - (i) Central Board of the Machine Tool Industry (Centralny Zarzad Przemyslu Obrabiarek) - located in Warsaw.
  - (j) Central Board of the Automotive Industry (Centralny Zarzad Przemyslu Motoryzacyjnego) - located in Warsaw.
- (3) Target No 2 to read "Polinex (imports machines and tools)." (4) Delete Targets No 8,9, and 11. (5) The location of Targets No 4 and 7 is Warsaw. The location of the targets carrying an "unknown" designation is probably Warsaw. (6) Target No 10 to read "Central Board of Rolling Stock and Railroad Equipment (Centralny Zarzad Przemyslu Taboru i Sprzetu Kolejowego) - located in Warsaw.
